THE MATSUMAE INTERNATIONAL FOUNDATION

Tokyo, JAPAN

THE FOUNDER'S CONCEPT

TOWARDS A GREATER UNDERSTANDING OF JAPAN AND A LASTING WORLD PEACE

I see the condition of the world today as consisting of conflict between the different national egoisms. The Club of Rome has identified three crises that endanger the future of mankind: lack of energy, lack of food supplies and burgeoning world population. Unless mankind learns to overcome these crises, there will be no lasting peace. The truth of the statement is undeniable, but in the conflict of national egoisms that surround us today, the road to peace is still a long one. Therefore, we are called upon to do more than stand aside from the current of history.

In order for Japan to co-exist peacefully with the other nations of the world, and to facilitate the tasks that await our young people in the 21st Century, we are now trying to prepare a forum for Japan's international activities. In this way, I believe we will be able to open up a path to the future that will preserve our nation and mankind.

Following the tragic experience of the Second World War, Japan firmly resolved to reject all attempts to enhance national prestige by force of arms and instead to follow a policy of peaceful reconstruction as an industrial nation. More than thirty years have passed since then, and it is now a fact that considerable friction has arisen between Japan and several foreign countries, especially in the fields of trade and economics.

We Japanese are now making earnest efforts to face up to this problem and are studying how to open a path to peace and prosperity on the basis of mutual understanding. My search for enduring peace and friendship among all nations of the world, and for an effective reminder of the path to which-we, as a peaceful nation, are committed, led to the decision to create this Foundation.

As will be clear from the statement of the purpose of the Foundation, I hope to invite active young research workers of outstanding character, without regard to sex, race, religion, ideology or nationality, to Japan. By deepening their understanding of Japan, and establishing links of trust and friendship, I seek to make a real contribution to permanent peace throughout the world. I shall therefore welcome from the bottom of my heart applications from promising young men and women who sympathize with our aims and wish to undertake research in Japan.

At this point, let me acknowledge the deep impression made upon me at the time of the establishment of this Foundation by inspiring ideals and practice of the Alexander von Humboldt Foundation, which operates under the sponsorship of the Federal Republic of Germany, and the far-reaching influence it has exerted. I would like to take this opportunity to express my deepest gratitude and at the same time to say that I intend to make all the efforts to accomplish the purpose and mission of the Foundation.

June, 1979

Dr. Shigeyoshi MATSUMAE, Founder
(1901-1991)

A Brief Personal History of Dr. Shigeyoshi MATSUMAE

Shigeyoshi MATSUMAE, born in Kumamoto, JAPAN, graduated from Tohoku Imperial University in 1925. In 1935, he invented the “Long Distance Non-Loaded Cable Carrier Communication System”, which greatly contributed to the development of an international communications exchange network.

In 1937, he was awarded a Doctor's degree in Engineering. Subsequently he was introduced to the noted Christian theologian, Kanzo UCHIMURA, and under his influence, decided to become an educator. In 1941, he was appointed General Director of the Engineering Dept. of the Ministry of Communications.

During the Second World War, as he pleaded for the termination of hostilities, and strongly opposed the war policy of the TOJO Cabinet, he was sent to the front line of the Philippines by then Premier TOJO as a second class private in the Imperial Army. Right before the end of the war, when conditions had changed somewhat, he was able to return to Japan. He was appointed Minister of Communications.

After the close of the war, he began to reconstruct a private college which he had founded during the war. From this base, he established what has now become the Tokai University Educational System. He was elected a member of the Lower House of the Japanese Parliament in 1952 and served for 17 years.

He has established a large number of educational cultural exchanges with universities throughout the world. For his efforts, he has received numerous honorary degrees and government citations from various countries.

He founded the Matsumae International Foundation in 1979.

He passed away in 1991 at the age of 89.

The Matsumae International Foundation (MIF) is a nongovernmental organization whose Fund is solely based on donations from many Japanese people who have responded with goodwill to Dr. Shigeyoshi MATSUMAE's call. While many donations have been kindly offered by corporations and groups, most of the donors are individuals who are sympathetic with the Founder's ideals, and maintain contributions to the Fund from their limited incomes.

Successful applicants are urged to seriously consider and understand the goodwill of those persons, and ensure that the provided fellowships are utilized effectively.
