

# EU Twinning in Science-Business links: Training Framework Programme – Interactive work

# What is your mood?

# What do you expect from this training?

Share your experience

Tips for filling application as some aspects in the manual were confusing.

To learn more about project proposal for Horizon Europe

practical tips on proposal writing

Learn more practical issues regarding EU framework programmes

Hands-on stuff

The hints concerning identification of the proper call

I expect to learn more about Horizon Europa and the possibilities we have to participate in this project

Practical examples

# What do you expect from this training?

To get information about how to prepare better project proposal

knowledge about proposal writing

great

I would like to expect to know about actual examples of your collaborations

How to find information regarding a relevant program and how to write a good proposal

learn more about Horizon project proposal preparation

To learn more on successful project submission for H-EU , to further distribute my knowledge

Issues that are covered by the training

To learn practical tips on how to join consortiums and where to find them, how to prepare successful application

# What do you expect from this training?

To develop project writing skills

learn deeply about this programm.

To learn more about project

To learn more about project

I want to learn more about project proposals.

Great future

Share your experience and knowledge more skills

Get new knowledge and gain experience for project writing

Acquiring soft skills in project writing :)

# What do you expect from this training?

I am expecting that Horizon program will initiate future projects in Georgia more intensively.

I will learn about practical aspects of preparing horizon projects that I have no experience with yet.

I am interested how I can write efficiently a project by knowing practical examples

How to write convincing proposal and particularly how to write the budget of the proposal? How to identify winning themes in political science? What are the best suggestions to establish contacts with consortium ?

Will be interested to share the experience concerning the calls

Practical aspects

To know more about Horizone and how to get real grant

Understand what types of projects can be submitted

I want to know exactly how to write a project proposal. I am a doctoral student and I am mainly interested in grant programs for me.

# What do you expect from this training?

I want to know exactly how to write a project proposal. I am a doctoral student and I am mainly interested in grant programs for me.

I would like to learn more about Horizon Europe priorities in my field of engineering physics, material science

learn more about the preparation of the project and get the experience

How to make successful statements.

to learn more about Horizon 2021 and get more information about how to prepare a project proposal

I expect to learn about all the key issues that need to be considered for drafting a project and submitting a proposal.

Hands-on experience sharing in all aspects

Learn more and get experience

It is important for me to study any details that will help me participate in the Horizon Europe competition.

# What do you expect from this training?

To learn more about project proposals

as a beginner researcher i want to learn about right way to write proposal an project writing skills .

increase knowledge about the Horizon Europe

Learn how to make the competent steps to projectmaking

I present here the research centre of International Teaching University of Management and Communications Alterbridge, and I am interested how this training how new University can be engaged in the program, what are the chances.

I would like to get more info about horizon Europe as a researcher. Get to more insight info practical issues, writing project, how to get consortium

to lern more about project proposal

To find out more about project preparation.

It is important to hear about your experience and also to do practical work including budgeting as a consortium.

# What do you expect from this training?

how to diversify my contacts and partners from EU and participate in the consortium

To learn more about the "Horizon Europe" and get information about preparing the project proposals

First of all, thanks a lot for this opportunity. I hope this meeting will help us to find good collaborators and prepare excellent project proposals!

to learn little bit more about practical things

Learn how to find the partners

Grant Proposal writing

Where to find good opportunities for young scientists

Consortium

to learn more about this project

# What do you expect from this training?

to learn project writing skills

Get more practical advices

to develop project writing skills

Project writing hacks

to learn more necessary information

Eu twinning project offers interesting experience to get knowledge in project preparation

Learn more

To get more information about the project.To get the information for the the preparation of a successful project proposal.To learn more about project priorityetc.

How to find collaborator institutions in Europe

# What do you expect from this training?

Budgeting

technical details for finding the right partners

I expect to hear a lot of news and discuss concrete examples about project proposal.

This is a wonderful opportunity

I'm here to learn more about HE grants as I want to participate in. I would like to know more about documentation part, what it is demanded from us, also I'm interesting in details of application form

To learn more about project writing skills

პროექტის მომზადების ტექნიკური ასპექტების გაცნობა

To learn more about writing proposal

I would like to improve my skills, have more practice in writing projects

# What do you expect from this training?

To learn more about Horizon project and write proposal

Learn more how to write successful project proposals and to get some useful tips

Who is eligible to participate

Development

To learn more

The main purpose for attending the training is to clarify issues regarding the grant documents. To be trained on how to prepare a good project proposal and have chances to achieve the success.

Learn more about possibilities to get institutional and individual involvementsHow to write proposal.

Composition of project activities

Learn more and get experience

# What do you expect from this training?

Development

To learn more about the project

More information on finding new projects

Key issues in project writing

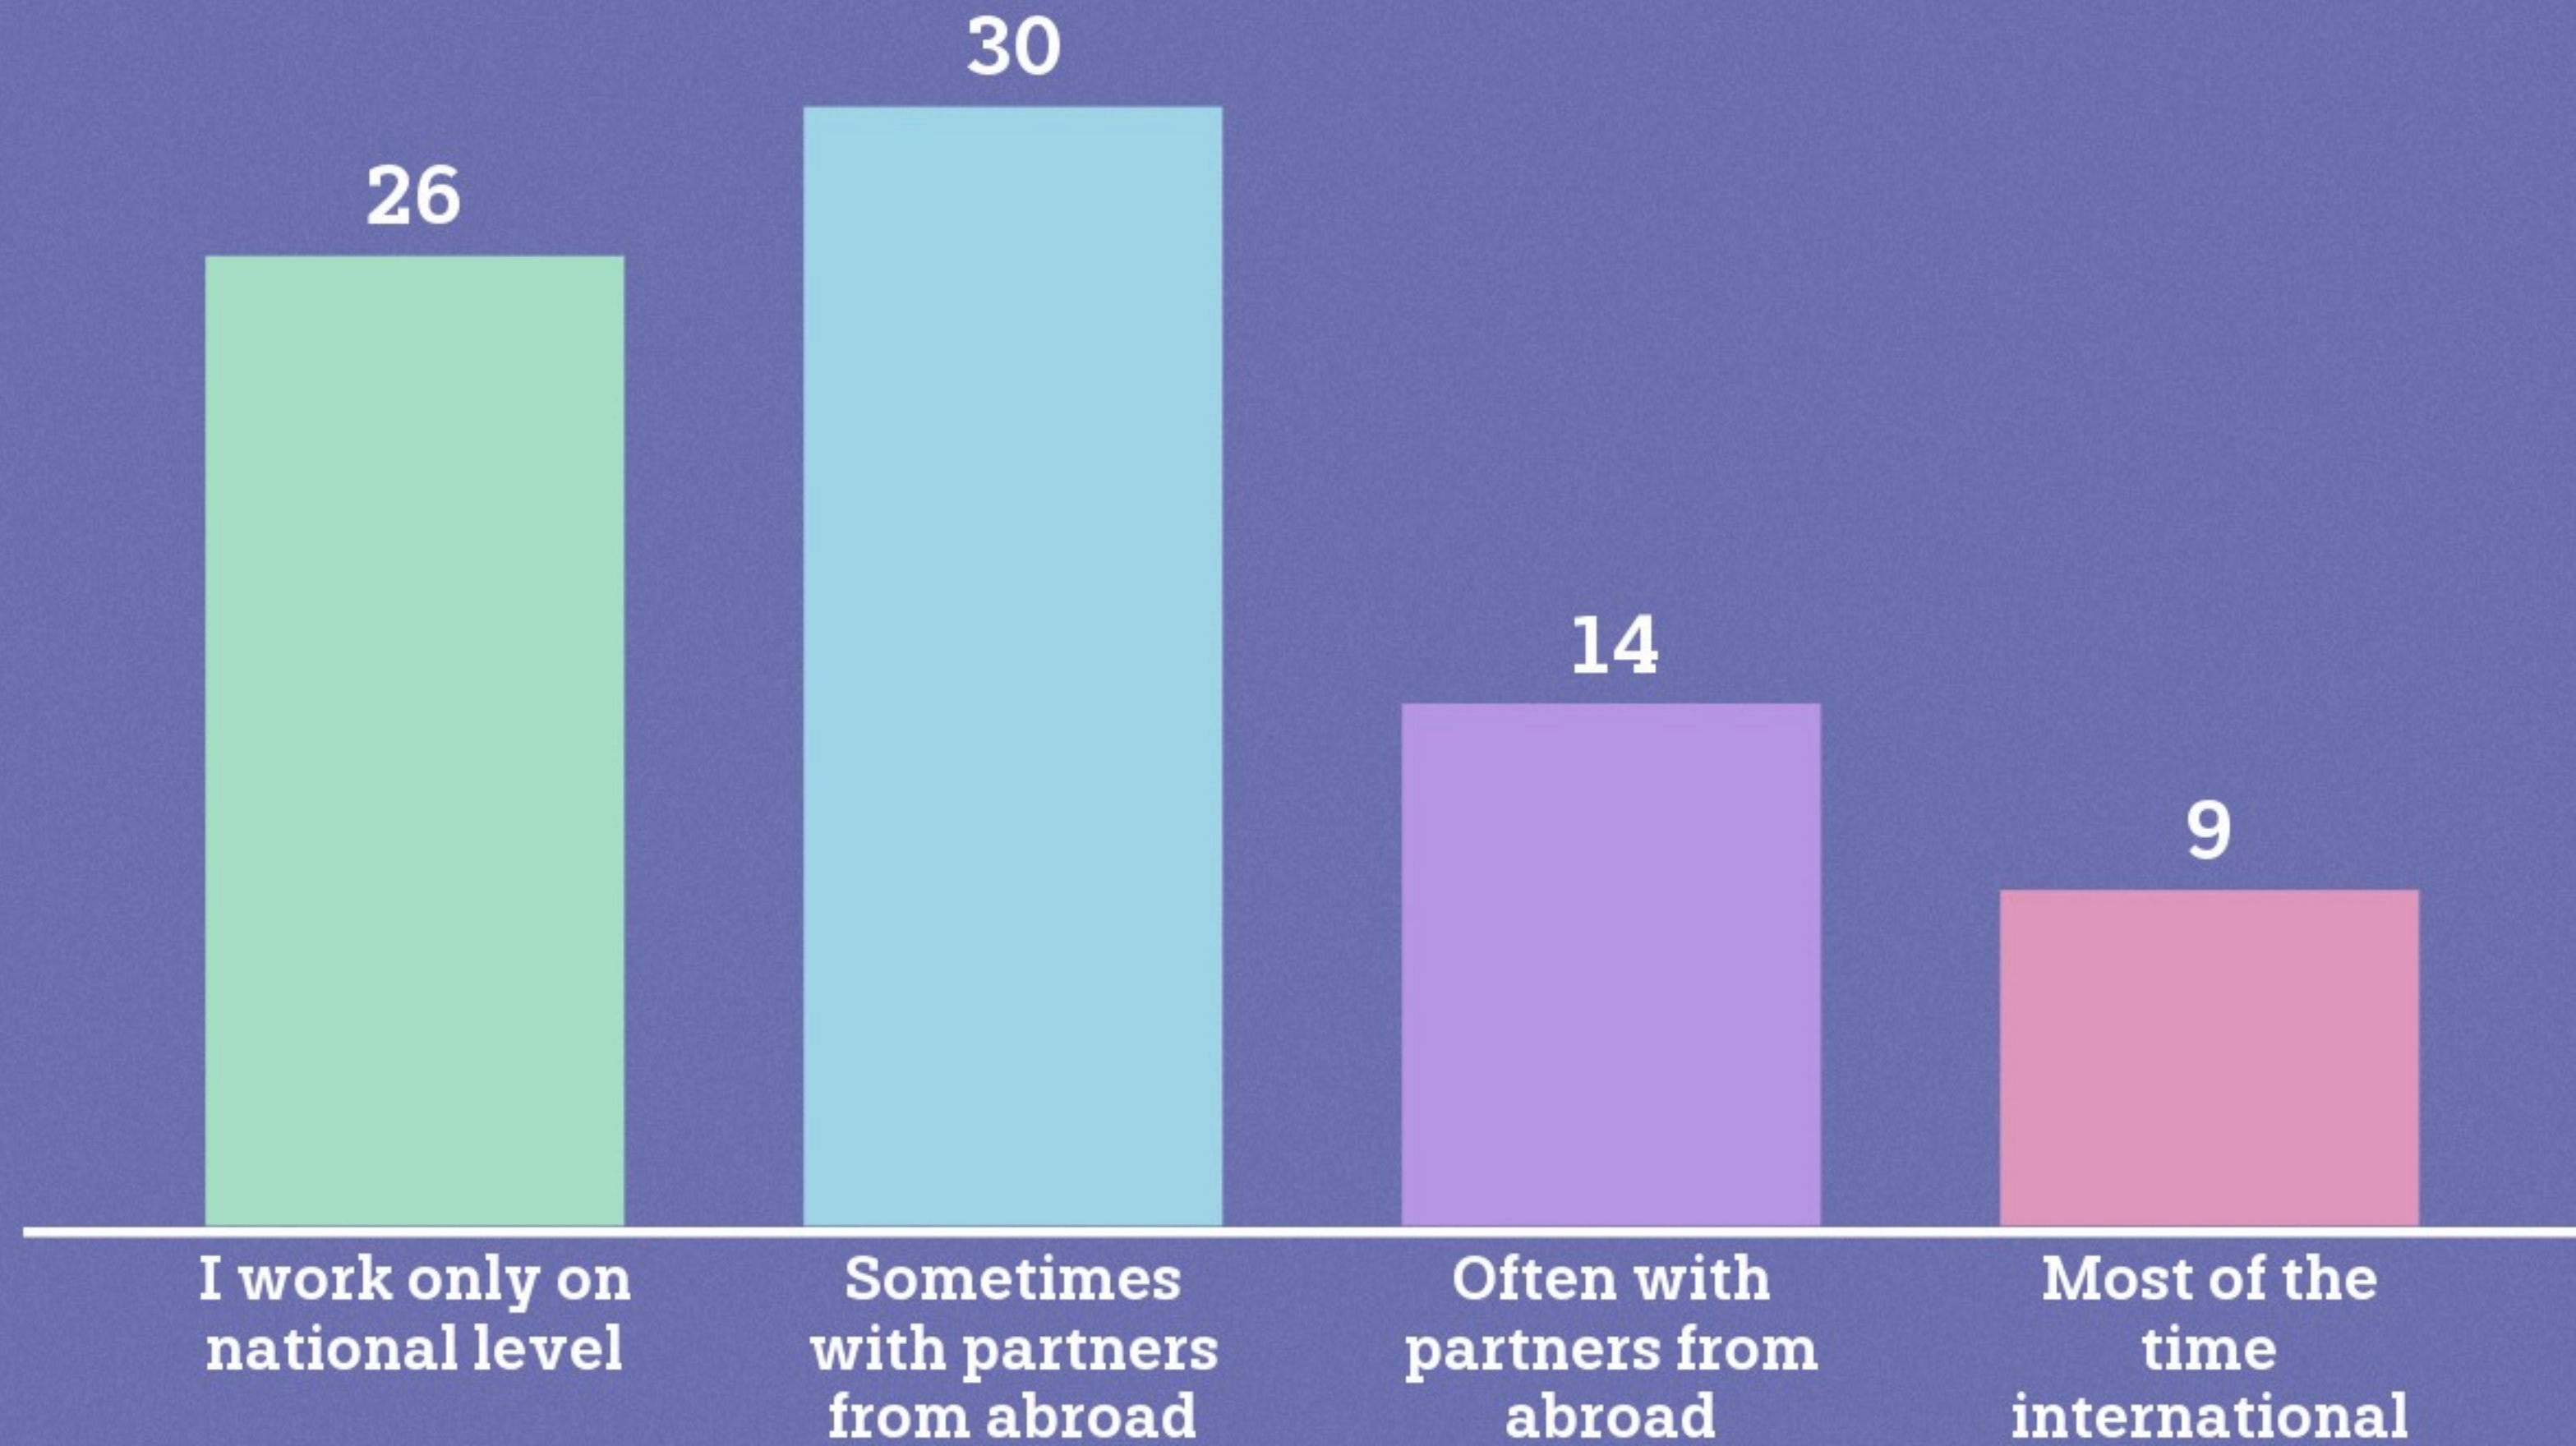

How to use the information gained from this training in practice

Learn more

# International networking experiences

- Firstly, we will get an overview of your experiences
- Then, please share your personal experiences with the audience (note: This is completely anonymous)
- Steps to create an international network
- Personal experiences
- Successes and failures

# How international is your work?

# International networking experiences

საერთაშორისო პროექტებში არ მაქვს მონაწილეობა მიღებული, ამიტომ ძალიან დიდი სურვილი მაქვს პროექტის განხორციელება განვახორციელო . უბრალოდ მაქვს უცხოელ კოლეგებთან ერთად საერთაშორისო კონფერენციების ორგანიზაცია და ნაშრომების რეცენზირება და ერთრეცენზირება.

I met a German professor at one of the conferences who later became my supervisor. Then with his help I developed the field of biotics at my university and to date we have already had several international projects.

Work on paper and participation in some projects

Visiting scientific conferences

Personal contacts are helpful for establishment of institutional contacts as well, although the main obstacle is time limitations

Participation in international projects, co-organizing international conferences

Unfortunately, I do not have

I have no experience

We often have foreign experts involved in local projects

# International networking experiences

Actions: participation in international trainings, webinars, conferences

Joint teaching and research project

Participating in Conferences, writing articles in international journals, that is all yet.

I was participated several YOUTH IN ACTION programmes, was volunteer by EUROPEAN VOLUNTARY PROGRAM(EUROPEAN SOLIDARUTY CORP)now I am junior researcher in international project

participating international conferences

I found it difficult to establish international connections independently. The pandemic made it even more complicated. The international conference also did not turn out to be enough.

participation in international conferences and webinars

Joint articles, conferences

PhD exchange programs

# International networking experiences

Only participate in an international conference

Short working visits abroad and conferences.

participation in international conferences, publishing my articles in international journals, working as editor in international journal

Collaboration, network through conferences, personal contacts through the university I did my PhD

Participate International Scientific Conference, some articles in International Journals

collaboration with foreign foundations such as Volkswagen, Australian University, France University, Senckenberg Museum

I was really lucky when I received the proposal from my EU colleagues which gave us the possibility to be involved in the Horizon 2020 program

As a young scientist I was looking for a foreign consultant to participate in various projects, I was contacted by email. I almost never got an answer. I only got in touch through a personal acquaintance.

Joint grant with French scientists, I had a French Government Scholarship

# International networking experiences

Participated in Marie curie actions, moved to Norway for PhD. Success + phd.Eu project moved to Prague. International papers published and good collaboration

Looking for potential partners on EURASHE

I was invited by the consortium of universities (ZOiS Berlin, Amsterdam University, Sorbonne University and others) to join the current call of Horizon 2020. Currently, we are waiting for the decision. I did my PhD in Switzerland and postdoc in US.

Already established partnerships in the field where our organization is working. Also visiting and presenting on international scientific conferences

Participation in conferences, writing articles, joint projects and visit for laboratory research

Participating International projects, conferences, summer school, fellowship

Creation of collaborative publications and working in projects

We have meetings at conferences and we have joint articles

I also do publications abroad.

# International networking experiences

Joint Scientific article in Enegies

Communicate and suggest your preferences. Attend more courses abroad and then keep and improve relationships

My PhD consultant is actually from USA, whom I meet first on International conference, I have just got lucky to talk to him

Exchange research scientific research

Due to the multidisciplinary of the research on the international level, you learn much more beyond your own research interests. international collaboration opens new opportunities

I was studying abroad with an exchange program

მაქვს საკმაოდ ბევრ უცხოელ კოლეგებთან კონტაქტი. ერთობლივ პუბლიკაციები გვაქვს გამოქვეყნებული საკმაოდ კარგ სამეცნიერო ბაზებში.

Participate in international Start Up sessions

I have participated in scientific conferences, field schools and have got master's, doctoral and postdoctoral scholarships.

# International networking experiences

working in the international projects

Preparing Horizon 2020 with other countries

I am organizer of several international conferences and have close communication to my colleagues from other countries. I had several joint research grants.

working in projects

Written contacts during administration

Exchange experiences with other scientists on [researchgate.com](https://www.researchgate.com)

Applying and implementing the research project funded by the international donors and funder for example MRC/UKRI, Gates foundation and so on

The more international connections one has the more open doors for new networks and new projects.

Very hard to establish personal contact by email.

# International networking experiences

we have some experience at the international level with financial support Sh. Rustaveli National Science Foundation (SRNSF), under different kinds of grants for young researchers.

I participated in the PhD program of the SRNCF and Carnegy Research foundation. this gave me opportunity to build my network and holt research in USA, Germany and Poland. This helped me to understand of how international science coomuncation work.

There are various science portals (researchgate, publons and etc.) and I have tried to make links on these portals several times but often other scientists refrain from participating in common science projects. The first is still a personal encounter

Sciencing of memorandum between our and partner organization

Exchange program helm me to meet my international partners for paper and little projects

Participations in conferences.

Participation in the Conferences, workshops, meetings ....

Having international scientific project, with Greifswald University (Germany) and Agricultural University of Gandja (Azerbaijan) . Have practical experience according to field works due to ecological aspects. Conferences; Seminars etc...

Quite rewarding to exchange experience, opinions, ideas, etc.An opportunity to grow professionally and also to come up with interesting co-operation ideas.

# International networking experiences

I was studying abroad and had an opportunity to participate in the international projects

Unfortunately, I have not much experience in international experience, but I have experience with my international colleagues at international conferences, also I am the erasmus+ participant for doctoral research.

Participate in scientific forums, jointly review articles, jointly prepare grants. Connection of research institutes with various scientific centers. Training abroad.

My experience of international networking includes more than 20 years. There were success ( participant of 2 EU projects in the consortium ), attending conferences almost every year ( till 2020! ), bilateral collaborations . joint publications.

I have experience in implementing a specific project in groups. Sometimes, this is with the support of Erasmus Plus and Shota Rustaveli National Scientific Foundation.

მონაწილეობა მაქვს მიღებული უცხოეთში ვორშოვში და ტრენინგებში.

working with the international projects

Databases of the different foundations

So far, I have no international connections

# International networking experiences

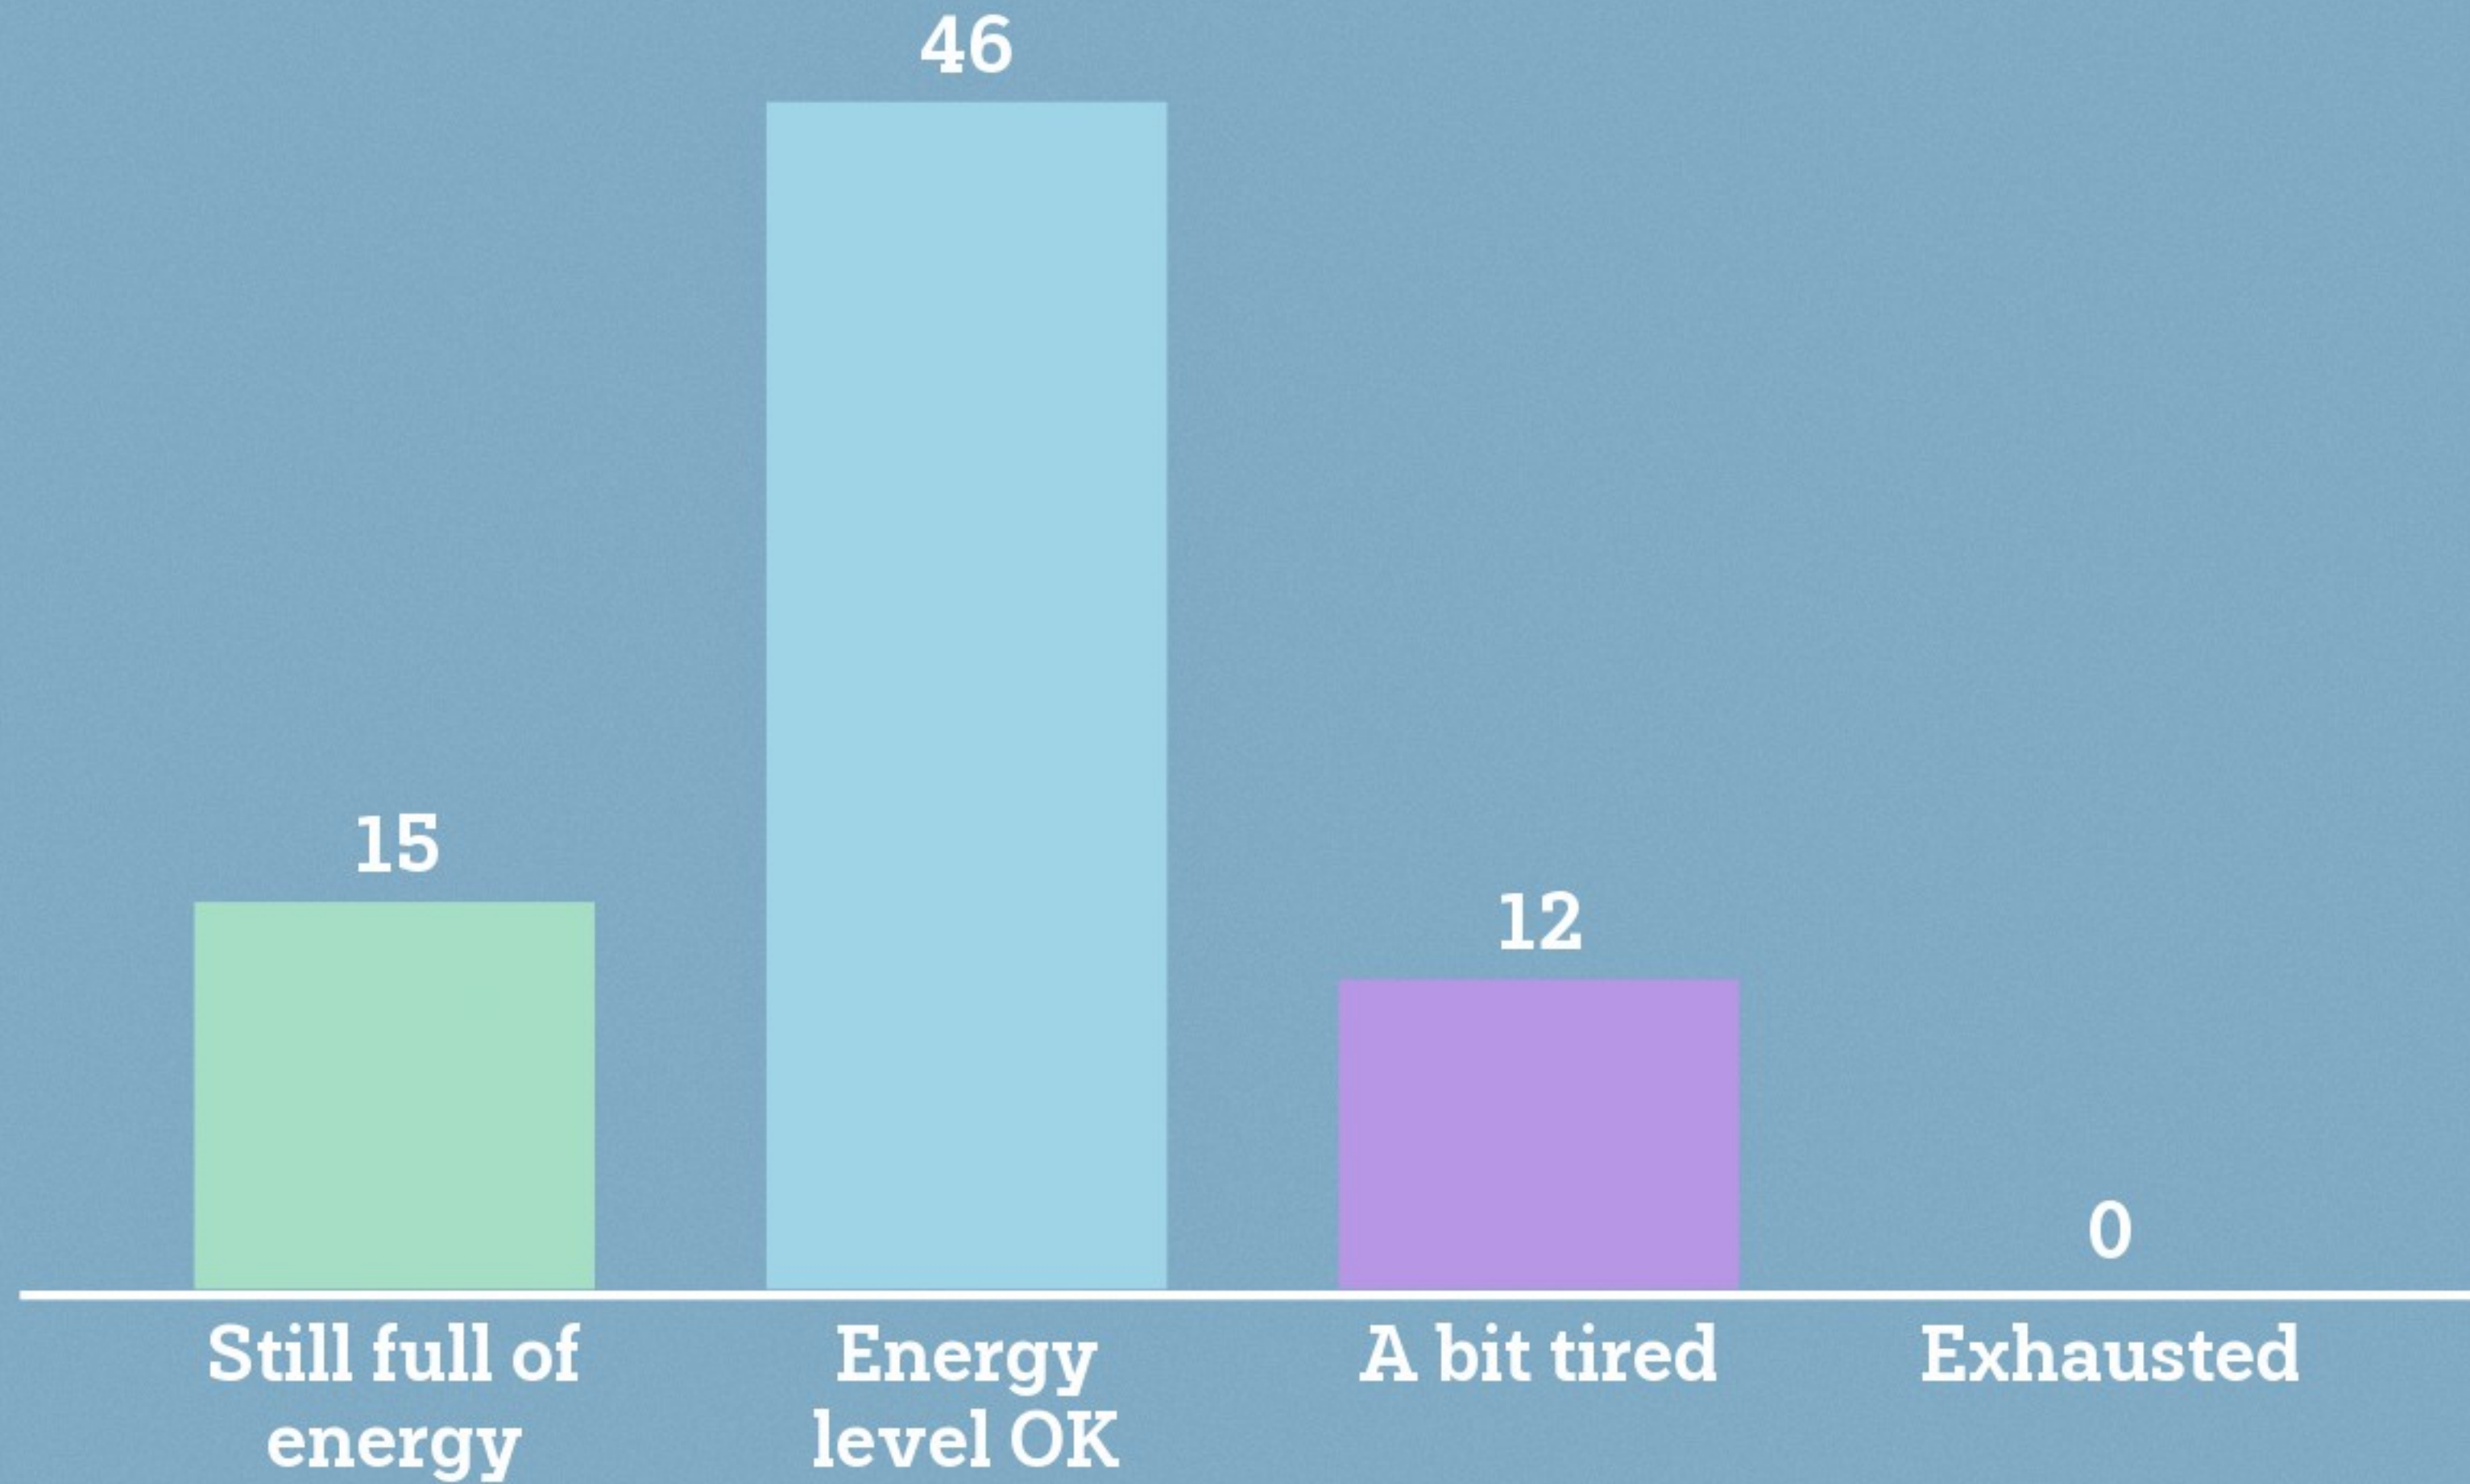

I have attended a summer school

International summer school, it was great experience

usually, I apply research grants offered from US or European countries, communicate scientists close to my research area, they invite and do research abroad at host university, then publish collaborative articles. also conferences meetings on inter

# How do you feel now?

# **EU Twinning in Science-Business links: Training Framework Programme – Interactive work**

# Proposal success factors (+) and shortcomings (-)

- Your observations from the analysis of an evaluation report
- + Positive observations
- – Negative observations

# Proposal success factors (+) and shortcomings (-)

The reviewers comments and analysis is in general acceptable and appropriate . Statements are clear. although we can't judge how it corresponds to the particular proposal( we cant's see it). Management issues seem to be most challenging. Room 2

a-

+Overall, the objectives are clear and pertinent, but they are mostly not sufficiently specific and not measurable (for example, objective 2, lists two activities which are not linked to measurable outcomes).The proposal is in principle in line with

+

+ The proposal contributes to some extent to the expected impacts mentioned in the work programme. The impacts have associated indicators.- However, some of these indicators are not sufficiently relevant and are rather general in nature. Therefore

- It's very difficult to estimate the evaluation without project.- Every evaluation results have 2 sides: 1) it's evaluated in positive in general; 2) it's evaluated in negative in details.

+ The resources assigned to work packages are in line with their objectives and deliverables. - However, a significant percentage of the total staff budget is devoted to WP2 and 3, which will lead to the production of a high number of reports.

+

The allocation of the tasks is appropriate. The proposal clearly states the organizations that lead each work package and the partners that contribute to them, and assigns appropriate resources to fulfil the roles of the participants. - However, the

# Proposal success factors (+) and shortcomings (-)

+

Objectifs are clear and well fitted with each other...

+ all aspects of the proposal should be clearly presented

The problem of climate change and its study is one of the most pressing topics

comments acceptable to me

The evaluation criteria are understandable and pleasing to us, but we did not have time to better understand them.

Comments are acceptable to me

+objectives were written detailed and well-explained, were connected with criterias

+ Doing anything beyond the requirements;- Be too general; not specific in details

# Proposal success factors (+) and shortcomings (-)

ძლიერი მხარე, მიზნების მკაფიო ფორმულირება, სამიზნე ჯგუფის კარგად განსაზღვრა, ჯ კარგად განსაზღვრა, სრულყოფილი დელეგირებასუსტი მხარე - ბიუჯეტის განსაზღვრა

+ clarify and sufficient , well planned- Some components, such as biodiversity, were not discussed in detail

+ clear objectives and methodology, innovative methods. addresses all the aspects of the call. relevant disciplines, multidisciplinary. easily monitored. long-term positive impact.

Clarity and pertinence of the objectives: two not measurable outcomes  
Coherence with the logic of the proposed components  
Impacts of indicators are not sufficiently relevant and are rather general in nature.

+ reviewer's are analysing the proposal deeply, so it is important to pay attention to all details and answer all possible questions in the project proposal.

The region where the survey was to be conducted was not specified

Objectives are not sufficiently specific and measurable -

- coherence of the project activities.- not clear objectives.- not good quality of the implementation plan.

Significant % of the total staff budget is devoted to WP 2 and 3

# Proposal success factors (+) and shortcomings (-)

I could not detect the negative context

+ Group working was superb + Sharing experiences & Acquaintance - Data sharing

+ Good Team, Good Goals and excellent Planning- Covid 19

- lacks exact information about the quantitative figures about the area and type of planned restorations

I did not have time for detailed analysis.

-Some components, such as biodiversity, were not discussed in detail+ Proposal was well planned, clarify and sufficient was good

-Sometimes it is not clear what is the main mission of the project.

The objectives of the project were clear.results must be specified in detail

- research outcomes and methods

# Proposal success factors (+) and shortcomings (-)

+ Ambitious reach out/dissemination activities implying involvement of a large set of stakeholders

We discussed - Nature regeneration Excellence - score 5; Impact 4,5; Quality and efficiency - 4.5- The proposal text is not clear how the project is going to implement- How and who will get the benefits

+

+Tas were distributed accordingly.

+ there are international participants+ there are support of the local authorities

Project-Climate change. Proposal - in scope, (+); Not enough attention given to actual implementation(-); Allocation of the task-appropriate(+).Risk and innovation management-appropriate(+).Consortium: complementary, relevant for the project

+ The current state of the art is well described.Plans to exploit and disseminate of the project is clear.Resources assigned to WPs are in line with their objectives and deliverables.

- Proposal aims to achieve two - both significant aims - but the balance and interrelation between the two is missing/ambiguous

დრო არ იყო საკმარისი

# Proposal success factors (+) and shortcomings (-)

it is the shortcoming that the proposal is not clear about it's synergies with subcontractors

The project is a fairly general description and how potential it will be in the future is difficult to determine

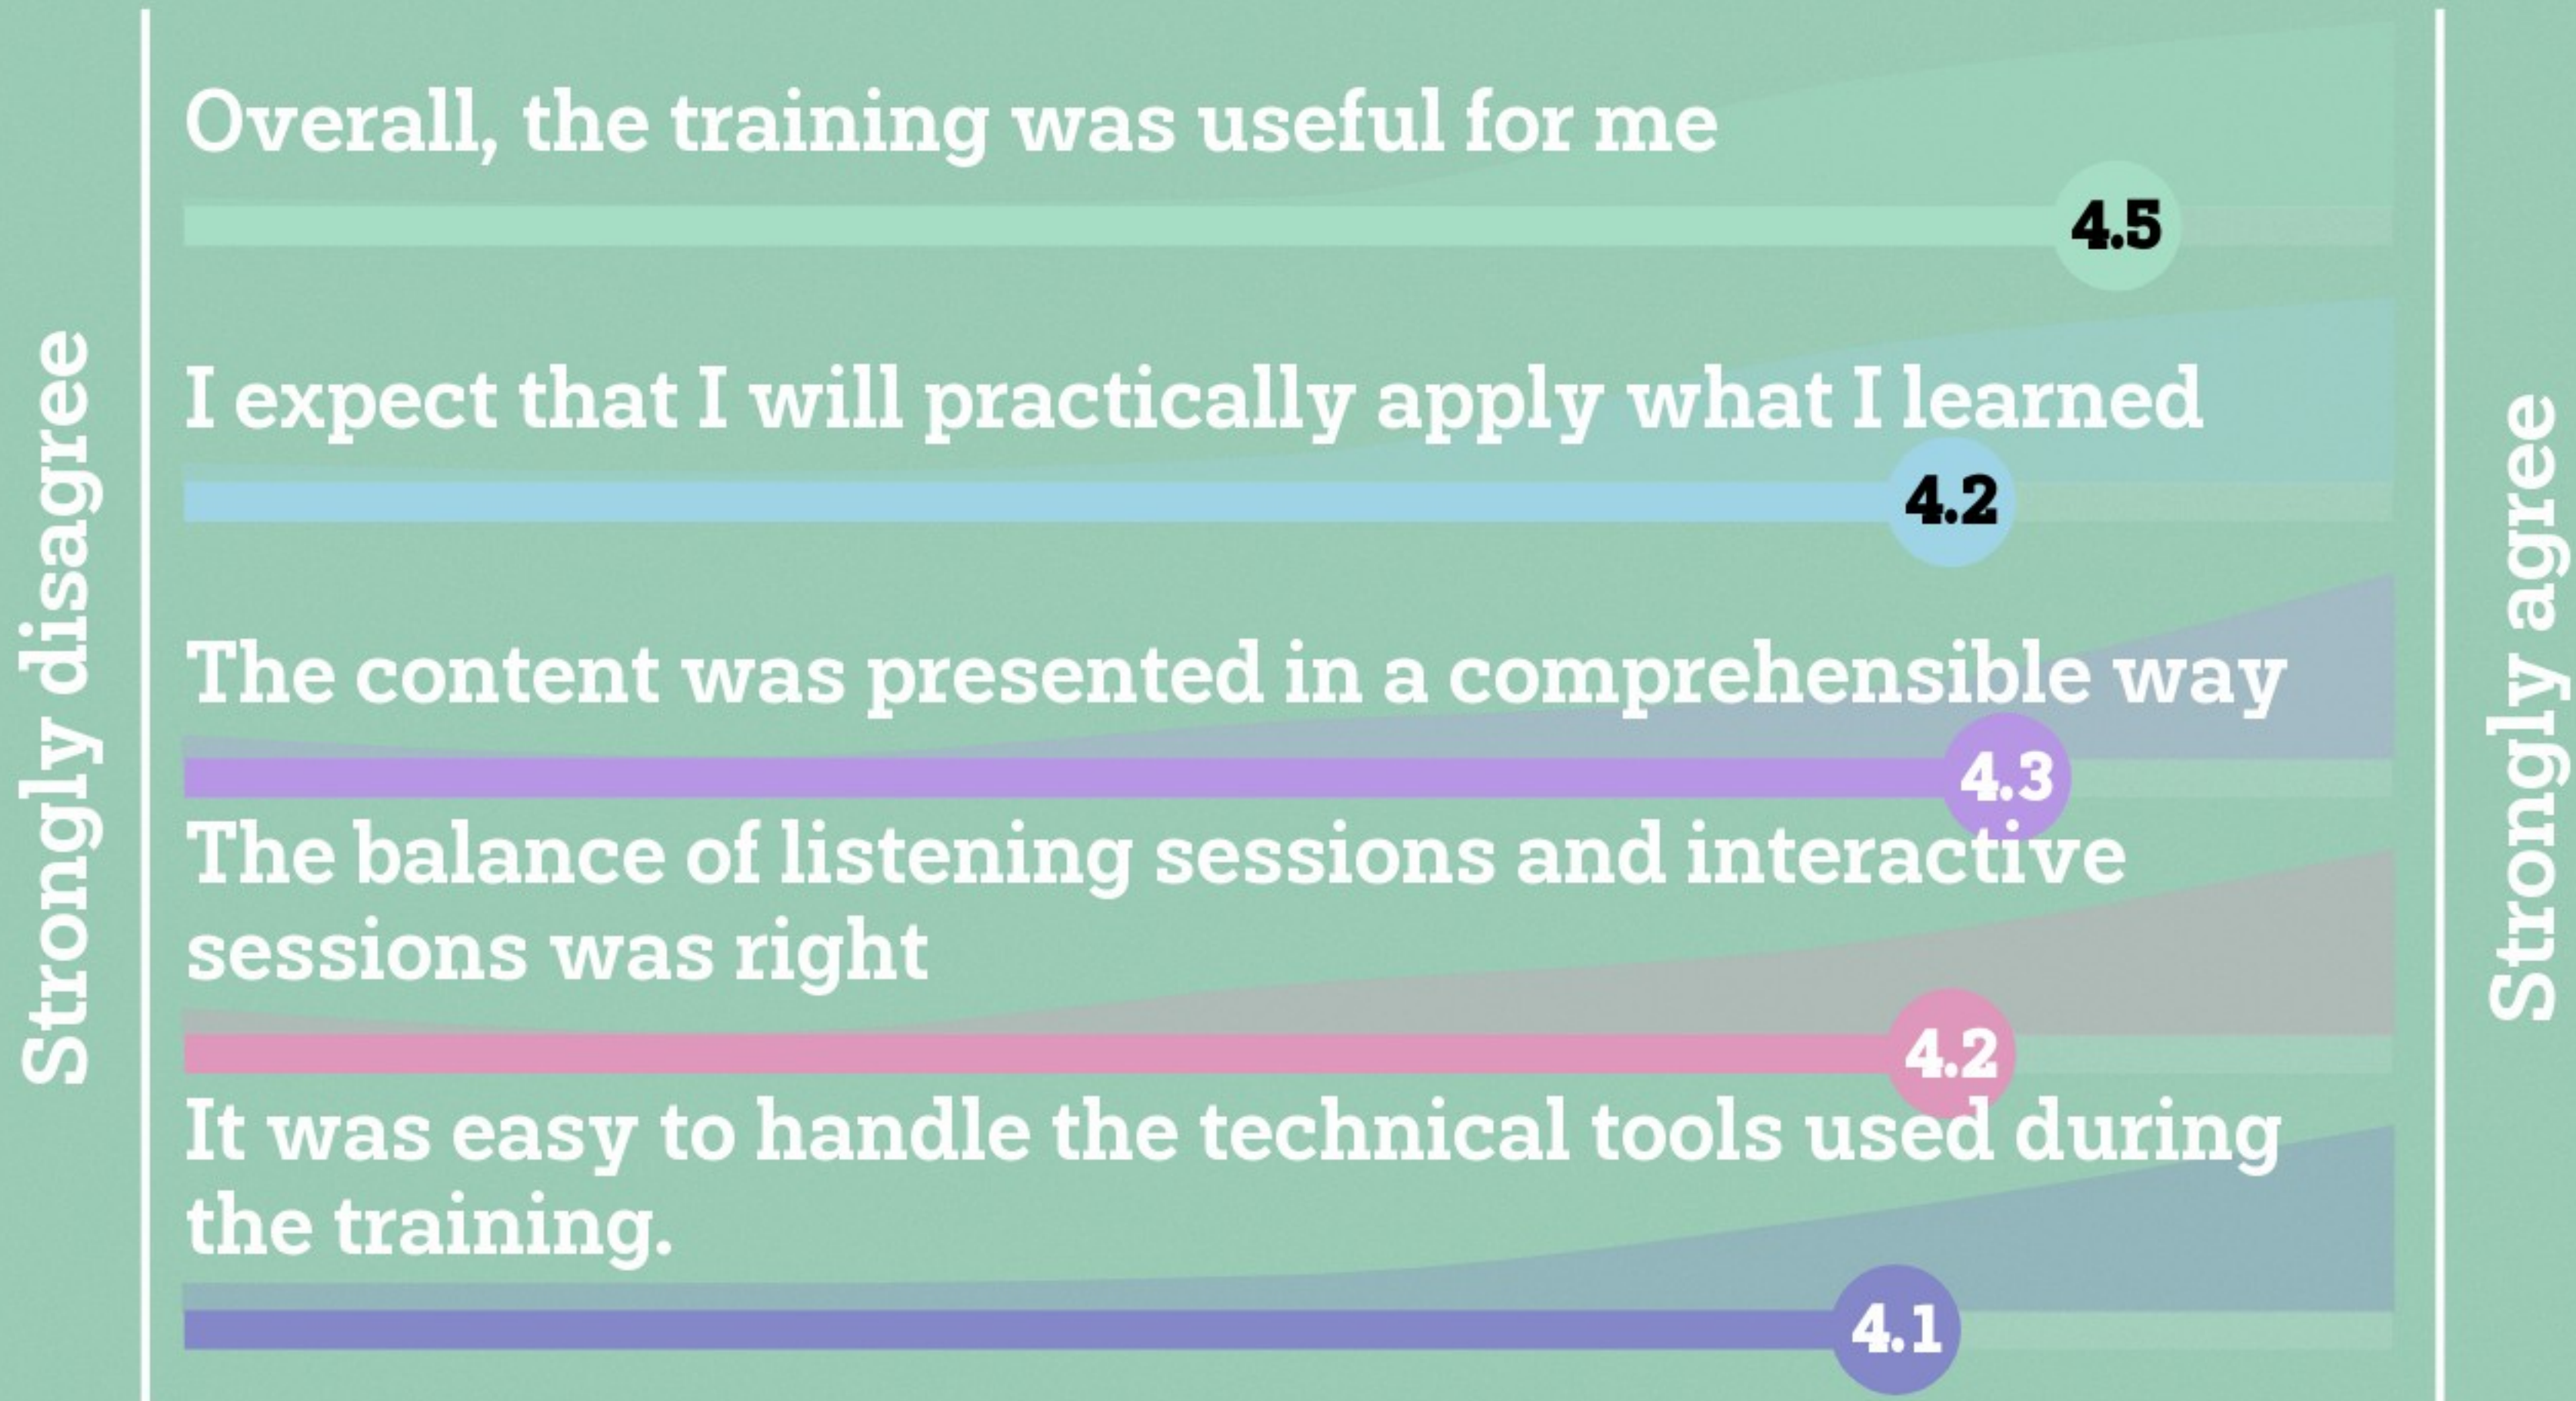

I did not have enough time for a detailed analysis

I did not have enough time for a detailed analysis

What wonders me: When a sub-part has 5 point max score and there are 4 questions in it, how do they come of with let's say 3 points (out of that 5)???

Thank you for your interesting seminar
